Dear Parent/Guardian,

The Center for Student Leadership and Expanded Learning (CSLEL) is providing opportunities for your student to participate in Career and Technical Student Organization (CTSO) Mind Bending Careers Conference virtually this year. The Nebraska Career and Technical Student Organizations include: DECA, Educators Rising, FCCLA, FFA, Future Business Leaders of America, HOSA, and SkillsUSA. Participation in these events will include providing student information during registration and during video conferencing.

Student information such as first and last name and email address will be collected during registration and used during the conference.

During the conference, content will be broadcasted online using video conferencing software to include Zoom and Microsoft Teams. These programs may not be included in the acceptable use policy signed by your local district.

By signing below, you are granting permission for the local district to provide the Career and Technical Student Organization and the Nebraska Department of Education the CTSO student information listed above. By signing you are also giving permission for your student to utilize the video conferencing software programs during the conference.

Please provide your consent by signing this form:
