

# Community ServUS Award

## Description

The purpose of this award is to recognize the Nebraska chapter that has contributed most significantly to their community based on hours of community service. Due to varying school and chapter sizes, this award is designed to recognize the chapter with the highest ratio of service hours to affiliated members. In other words, a chapter with 150 hours of community service and 10 affiliated members would fit the criteria better than a chapter with 150 hours of community service and 50 members. ***These hours must be completed between August 1 and March 1.***

## Project Description Page:

For each project, please include a project name, date(s), description, and how many members participated. Then include the average number of hours contributed by each participating member. For project hours, multiply the number of members participating by the number of hours per participating member. It is also required that a photo, flyer, or comparable material be provided as evidence for each project.

## Total Service Page:

Once all projects have been included, add the project hours and put the amount into the total hours section in the final chart. Then list the number of affiliated members in your chapter. The final amount can be calculated by dividing the total hours by the number of affiliated members. This amount gives the average hours of service per affiliated member and will be used in determining the award winner.

Final applications should include a Project Description Page for **each** completed service project **and** a Total Service Page calculating the amounts.
